## **RADIATION SAFETY**

Radiation can be defined as energy traveling through space. Some forms of radiation are essential to life, but over exposure to some sources can also cause tissue damage.

Radiation sources are found in a wide range of workplace settings. The use of radioactive materials is regulated by the Canadian Nuclear Safety Commission (CNSC) which sets requirements for its use, possession and disposal.

If radiation is not properly controlled it can be potentially hazardous to the health of workers.

### **Training Solution – Online Radiation Safety Course**

This course will provide participants with a basic awareness of radiation hazards and safe work practices to apply in order to reduce the risk of over exposure.

#### **Course Overview**

Upon completing **Radiation Safety**, participants should:

- Recognize the different types of radiation
- Understand how radiation interacts with matter
- Understand the biological and health effects of radiation
- Learn how to protect themselves from exposure to radiation
- Become familiar with legal obligations with respect to radiation
